DETAILED ACTION

Claim Objections

Claims 15-17 are objected to because of the following informalities: These claims, which claim a method, depend from claim 14, which claims an apparatus. For examination purposes, it has been assumed that claims 15-17 should begin "The apparatus of claim 14,...". Appropriate correction is required.

Claim Rejections - 35 USC § 112

The previously made rejection under 35 U.S.C. 112 first paragraph is hereby withdrawn in light of the amendments to the drawings and specification filed 7/7/03.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 14-21 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 4,595,282 to Takahashi.

FIG. 1 of Takahashi shows an apparatus including a beam shaping means (mask 2), an electromagnetic beam (from light source 1a), a positioning means (wafer stage 8), and shot exposure means (shutter 1c). The remaining limitations found in these claims are merely

Art Unit: 2851

functional limitations, and are therefore not given patentable weight. As evidence that these are merely functional recitations, Examiner would point out that at no point in the specification or claims, or anywhere in the drawings is there given any structural differences between the claimed invention, carrying out the various processes claimed, and an exposure apparatus of the prior art. Applicant is reminded that “[A]pparatus claims cover what a device *is*, not what a device *does*.” *Hewlett-Packard Co. v. Bausch & Lomb Inc.*, 909 F.2d 1464, 1469, 15 USPQ2d 1525, 1528 (Fed. Cir. 1990) (emphasis in original), and is directed to section 2114 of the MPEP for further clarification.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Patent No. 5,117,254 to Kawashima et al. discloses a prior art exposure apparatus meeting the limitations of claims 14-21.

U.S. Patent No. 5,140,366 to Shiozawa et al. discloses a prior art exposure apparatus meeting the limitations of claims 14-21.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 2851

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
